OSPREY, FL (March 8, 2022) Conservation Foundation of the Gulf Coast recently received a \$75,000 grant from Gulf Coast Community Foundation in support of their joint project with Sarasota Audubon Society to re-wild the Quad Parcels at the Celery Fields. The grant was made possible through Gulf Coast’s Environmental Initiative Fund and is designated to implement strategies from their Community Playbook for Clean Waterways.

Released in early 2021, the Community Playbook for Clean Waterways is a comprehensive online manual highlighting activities to reduce and remove manmade nutrient pollution in our region’s waterways. Conservation Foundation and Sarasota Audubon Society aim to implement activities from five of the Playbook’s ten chapters as part of the Quad Parcel re-wilding.

“Gulf Coast Community Foundation is committed to improving water quality and stewarding initiatives to help improve our environment. The re-wilding of the Quad Parcels at the Celery Fields will improve our environment in many ways, and we are honored to support this amazing project,” said Gulf Coast Community Foundation’s Vice President of Community Leadership, Jon Thaxton.

The re-wilding includes improvements to an existing stormwater pond on the northeast parcel, along with the addition of a stream on the southeast parcel. This will allow for enhanced water filtration and storage, thus improving the water quality that flows into Phillippi Creek and ultimately Sarasota Bay.

The re-wilding also includes extensive plantings of native species, benefitting birds and other wildlife while at the same time enhancing the ability of the soil to naturally process nutrients and retain water. A no-mow shoreline will be established as part of the improvements to the existing pond which will prevent grass clippings from directly entering the water and releasing nutrients that stimulate algae growth. The pond will also serve as a learning tool to demonstrate how effective stormwater ponds can filter pollutants when they incorporate native plants and are sustainably maintained.

“Ensuring water quality and quantity is a top priority for Conservation Foundation and safeguarding our local water resources is one of the primary goals of the Quad Parcel re-wilding,” says Christine P. Johnson, President of Conservation Foundation. “We are incredibly grateful to Gulf Coast Community Foundation for their investment in this community project and their ongoing commitment to both our work and the future of our region.”

About Conservation Foundation

Conservation Foundation of the Gulf Coast protects land and water in Southwest Florida for the benefit of people and nature. Working with landowners, businesses, and government, Conservation Foundation saves land forever, protecting those special places that make this region extraordinary. A nationally accredited land trust, Conservation Foundation purchases natural areas, holds voluntary land protection agreements, and educates for responsible land and water stewardship in Manatee, Sarasota, Charlotte, Lee, and Collier Counties. Learn more and join in their mission at conservationfoundation.com.

About Gulf Coast Community Foundation

For more than 25 years, together with our donors, Gulf Coast Community Foundation has transformed our region through bold and proactive philanthropy. Gulf Coast is a public charity that was created in 1995 through the sale of the Venice Hospital. Since then, we have become the philanthropic home of over 950 families, individuals, businesses, and organizations that have established charitable funds here. Together, we have invested over \$430 million in grants in the areas of health and human services, civic and economic development, education, arts and culture, and the environment.
